### **DETAILED ACTION**

1. This action is responsive to communications: Application filed on 6/14/2001, Drawings filed on 10/9/2001, and Declaration filed 10/9/2001.
2. Claim 1 is pending in this case. Claim 1 is an independent claim.

### ***Drawings***

3. The drawings were received on 10/9/2001. These drawings are accepted.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Hazlehurst et al. (hereinafter Hazlehurst, US Patent Number 5,974,412).

**Regarding independent claim 1**, Hazlehurst discloses a method in which a data structure comprising categories (i.e. Concept 1 and Concept 2 of Figure 2) is searched for elements based on an input (column 20, line 63-column 22, line 28 and Figure 2 of Hazlehurst). Hazlehurst also discloses that statistics are calculated to describe the relevance of each of the elements, using these statistics to rank the elements relevance to the input (column 20, line 63-column 22, line 28 of Hazlehurst). Hazlehurst discloses that it is determined whether or not the elements exceed a threshold confidence value and once the value is exceeded the searching is terminated and the results are returned (column 23, line 56-column 25, line 13 of Hazlehurst).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
